About TexasVentures

Established in 1998, TexasVentures has become one of the world's leading provider of industry based research and knowledge services. We currently provide a number of services and products to the industry globally that includes:

Sector Research & Competitive Intelligence

TexasVentures is a leading research organization for industry vertical sectors. Since 1998 we have worked with many top global projects and helped companies with vital research inputs. The key areas include best practices and emerging models.

By partnering with TexasVentures, companies receive access to an experienced business intelligence unit, with a team of highly trained industry analysts with years of hands-on industry expertise. TexasVentures analysts cover 4 languages, work on 4 continents and have completed hundreds of research projects.

CEO Round Table and Executive Conferences

TexasVentures is the leading producer of worldwide annual large-scale CEO Round tables and executive level conferences covering the manufacturing and services sector. Our events are focused to reflect the most important issues, current developments and latest trends in the industry. TexasVentures regularly attract CEOs and senior executives from top global companies.

Consultancy Group

TexasVentures runs a program that provides credibility and awareness for a company's brand and/or solution to a global audience. We research, produce, write and consult for companies through a network of senior consultants that include top line management gurus.

Welcome to Global Manufacturing Cluster Vision 2020

India is alive to the historic challenges facing nations in this epoch of accelerating global change. An underlying premise of future growth is that manufacturing is critical to India's future progress. Manufacturing will unquestionably be a very different enterprise in 2020 from what it is today. A critical step in preparing for the future will be the development of an underlying foundation which must be guided by a clear vision of manufacturing in the next century and an understanding of the fundamental challenges that must be met to realize this vision.

Global Manufacturing Cluster Vision 2020 - GMCV 2020 - conference is an effort to bring out the leaders from Indian manufacturing to discuss these diverse issues amidst South India's largest manufacturing exposition INTEC 2009. Organised by the country's foremost entrepreneur association "CODISSIA" which has strived in making this belt one of the most successful industrial belt without much government support, this conference also salutes the spirit of this "Manchester of India" which has driven to become country's second largest auto component manufacturing hub.

INTEC 2009 strives to bring best in class speakers and delegates in association with Knowledge & Research Partner "TexasVentures" to provide an opportunity to share their concerns. GMCV 2020 will explore topics such as how to be a market contender in global market place and equip CEOs with leadership skills.
